

ALOTEQ

DIGITAL SOLUTIONS COMPANY

Artem Lagunovskiy
Managing Partner

Alexei Gretchaninov
CTO Founder

Konstanty Maksimczyk
Head of Web Development

Gena Mironchik
Head of Mobile App Development

Dima Poznyak
Head of UX/UI Design

Our leading experts cover all aspects of mainstream technology. With expertise in design, frontend, and web and mobile app development, we are a team baked to succeed. Our team has accrued years of experience in product development, key to launching cutting-edge products for our clients. As a full cycle software powerhouse, we work closely with our clients from conception to launch in order to provide a successful product tailored to our clients' aspirations and business goals. Once we have fully developed a product our clients are enthusiastic about, we are acquainted with common risks (such as how to mitigate the potential for app rejection) to ensure a successful launch.

EXPERIENCE

BUSINESS ANALYSIS NETWORKING SCRUM KANBAN PROJECT MANAGEMENT

BUDGETING MARKETING OPERATIONS AND ETC.

Artem spearheads regular company operations and fine-tunes our teams' processes. His experience as CEO of several startup projects in IT and other economic sectors equips him with the knowledge to help client businesses run smoothly. In addition, Artem promotes strong team camaraderie with his expertise in project management, not limited to Kanban and SCRUM methodologies. He is masterful in analytics as well as communication skills. Artem is essential towards production, as he analyzes business models, dissects them, and discovers technological solutions to create unrivaled Products.

Konstanty's expertise in software systems architecture and documentation coupled with his excellent ability to manage product teams justifies his position as head of web development. He's responsible for the development of powerful applications and databases that can process petabytes of data. In addition, he conducts code review, test case review, writes end-to-end scenarios, and oversees performance testing development with execution. His literacy with software architecture enables him to provide technical documentation of development for existing functionality, and can even use C4 models for visualizing software architecture. Konstanty is also in charge of the technologies and frameworks used.
